NOTES:

This list only includes classrooms (and new classroom spaces) scheduled for classes in FA/20.

The "student cap" column is the socially-distanced student capacity for FA/20.

The "sound system" column indicates the room has a dedicated sound system capable of broadcasting the speaker's voice to the room. All classrooms have sound systems (or speakers on the projection cart) for program sound from computer or DVD. For rooms without a dedicated sound system, it is possible to broadcast the speaker's voice using available USB wireless headsets; contact the Help Desk for details.

A number of classrooms have been upgraded this spring or summer. Upgrades are described in the "upgrade notes" column.
